Introduction:

This project is suggest to us under the academic course ECE 2100 in Second year odd semester course. This project is supervised by Sagor Chandro Bakchy, Assistant Professor , Department of Electrical and Computer Engineering, RUET and Md. Mahabubur Rahman, Assistant Professor , Department of Electrical and Computer Engineering, RUET. In this project I tried to make a website for myself using HTML , CSS , Javascript and PHP programming language.

Used tools:

In this project I've used sublime text version3.2. For programming I've used HTML 5 ,CSS 3 , Javascript ES7 PHP 7.2.

Hardware description:

This project is developed in the environment of Wnidows10 operating system. This is a 64-bit operating system. The hardwares in this system is follows

1.Processor: In this system there is a Intel core™ i3-6006U processor which has a average processing speed 2.00 GHz. The average Windows experience index for the system is 4.50. \

2. RAM: The physical memory(RAM) installed in this system is total 4.00GB which provides a usable memory of 3.89 GB

3. Graphics property: In the system, the installed Graphics adapter is Intel(R) HD Graphics 520. Which provides a total Available Graphics Memory 3986 MB.

4.HDD and Device: This system runs in a Laptop computer of model "HP NOTEBOOK F.14" made by the Hewlett Packard Company Pvt. Ltd. The available HDD in the system is 485GB.

Purpose of the Project:

I'm a freelancer, web developer and youtuber. For freelancing if anyone wants to know about me or contact with me they can visit this website and contact with me. There is also some demo of my works in my photo gallery they can check my work and hire me,if they like my work.

Details of my Website:

At first we can see home page,,It contains with navigation bar and some texts.

Fig1 : Home Page

Then we can find About me section were anyone can know about me and download my cv.

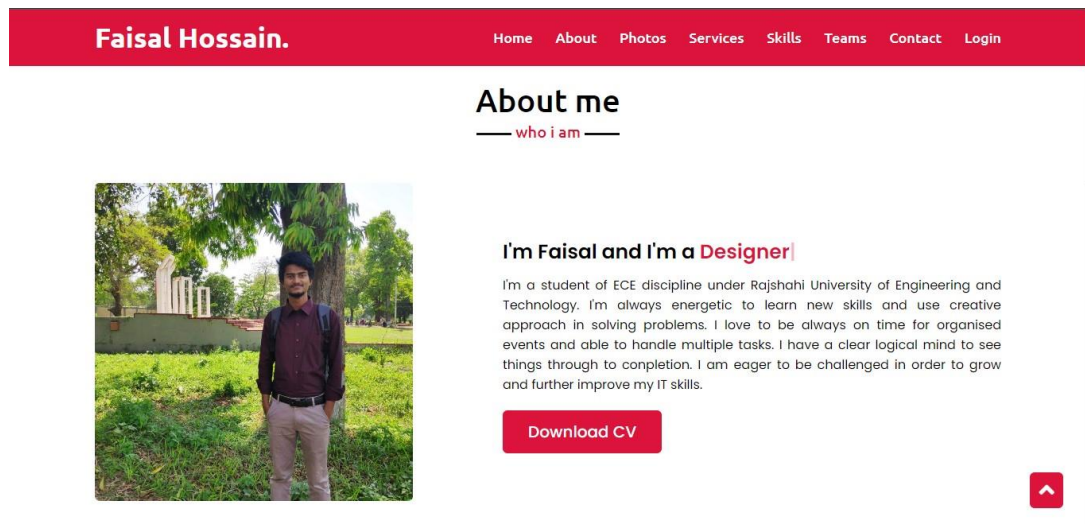

Fig2 : About me Section

After that I've my own photo album where anyone can see my work.

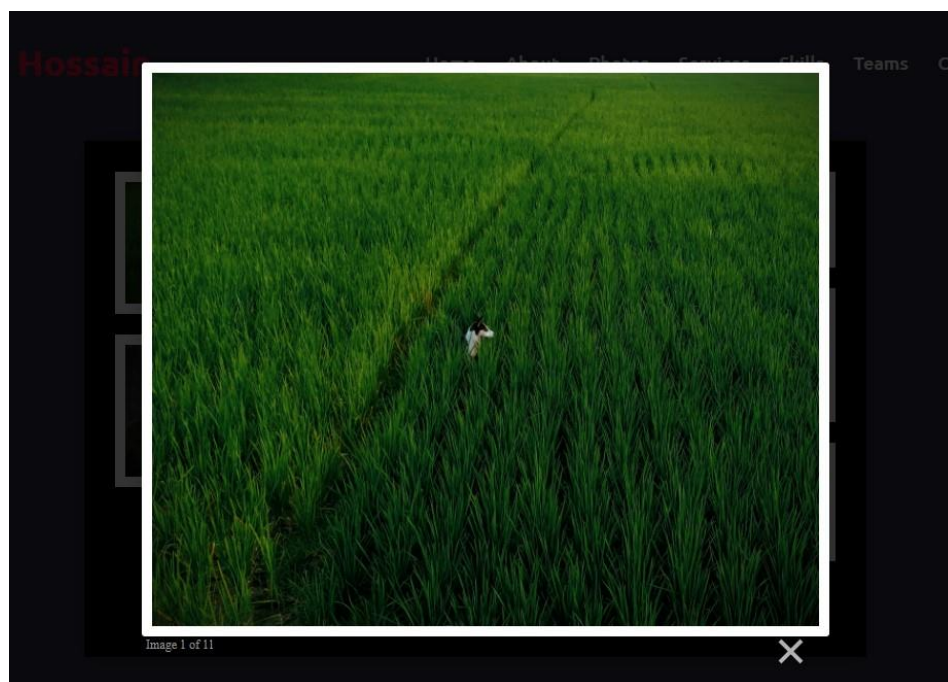

Fig3 : Photo Album

Fig4: Sliding,Image cout and Exit

Also you can see my services, skills and team members.

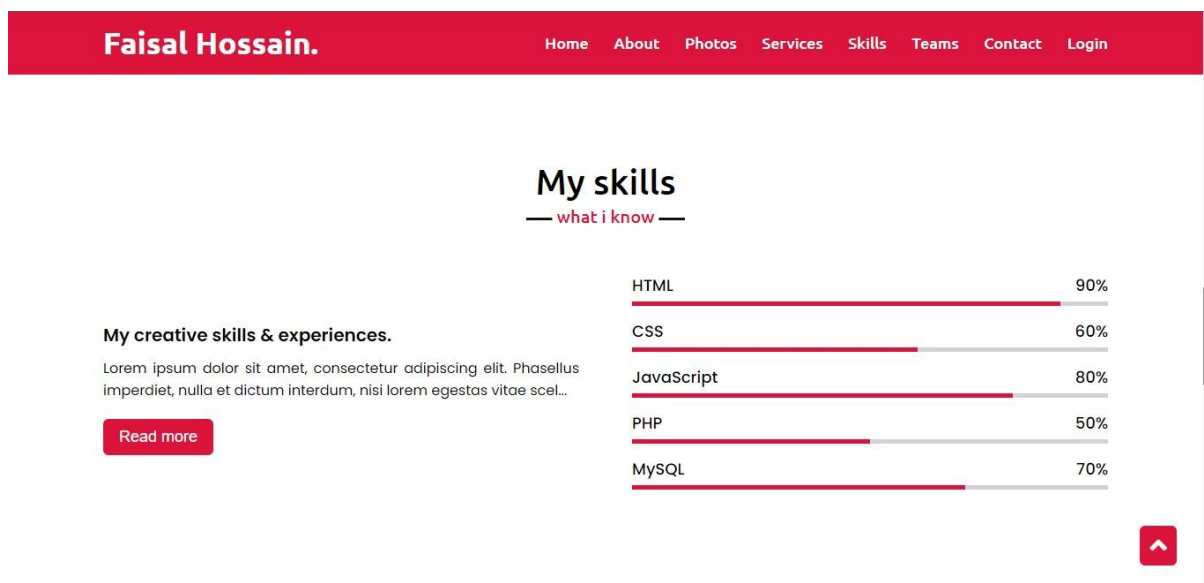

Fig5: Services that I provide

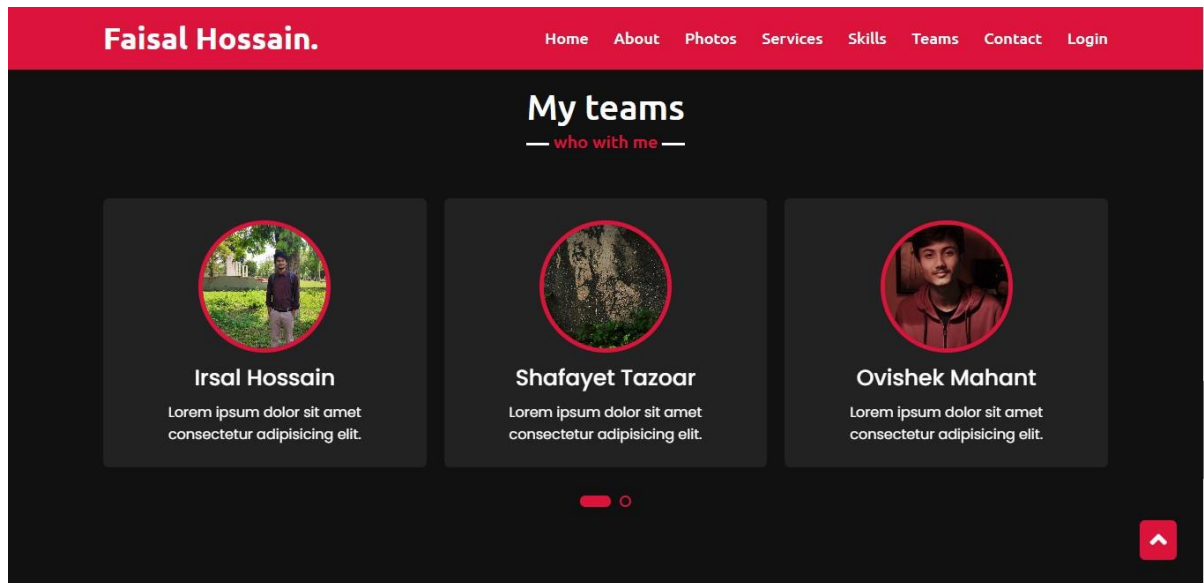

Fig6: My skills

Fig7: Who works with me

Finally if you are interested to work with me,you can drop e messege.

Fig8: Contact Section

Here also an admin panel where I can upload my photos and check my messeges.

Fig9: Admin Login Page

After login with correct email and password.

Conclusion and Discussion :

The website is a very simple one. Anyone who needs me can know about me easily and contact with me easily. I tried to design it beautifuly and tried to add animation and effects to look attractive.

Although it is a very simple project ,it is my first project. So I tried my best to do better.
